

SAIKAT SAHA

sahasaiikat782@gmail.com | +91 9635473546 | github.com/Saikat-github | [Portfolio](#)

TECHNICAL SKILLS

- **Frontend:** React.js, Redux, Context API, React Hook Form, TailwindCSS
- **Backend:** Node.js, Express.js, REST APIs, Passport.js (Local + Google OAuth), JWT, express-validator
- **Database:** MongoDB, Mongoose (complex schemas, aggregation pipeline, transactions, migration, indexing)
- **Payments:** Razorpay (webhook verification, HMAC), Stripe
- **Auth:** Email OTP (cryptographically secure), Google OAuth, RBAC, session & JWT, Firebase auth
- **Infra / Tools:** Cloudinary, Resend, Cron Jobs, Rate Limiting, Git, GitHub, WebSocket / Socket.io

PROJECTS

Minimalist Gyms — Production-Grade Gym Management Platform — [Live](#)

- Built a full-stack SaaS-style gym platform with separate user-facing and admin portals — **solo, from scratch, delivered to a real client.**
- Auth: Email OTP (crypto.randomBytes), Google OAuth via Passport.js, session-based auth, account deletion with **Mongoose session (multi-document atomic rollback).**
- Payments: Razorpay integration for membership plans and day passes — **HMAC webhook signature verification** on the backend, plan auto-renewal logic.
- Admin Panel: **RBAC with Super Admin** + limited-permission admins. Super Admin created via **DB migration.** Admins can filter members/users/payments by name, status, or date range.
- Backend: Mongoose schemas designed for production complexity. All inputs sanitized and validated at controller level.
- **Tech:** React, TailwindCSS, React Hook Form, Node.js, Express, MongoDB, Mongoose, Passport.js, Razorpay, Cloudinary, Resend, Cron, Rate Limiter, MongoDB Aggregation pipeline

Burdwan Turf — Freelance Project — [Live](#)

- Sole developer on a production grade turf booking platform for a real client — **handled full lifecycle from proposal and design demo to deployment and phased billing.**
- Real-time slot booking with **MongoDB atomic operations (\$inc)** to prevent double-booking **race conditions** under concurrent requests.
- Auth: Separate owner dashboard secured with **JWT** — admins can manage bookings, block slots, and configure opening hours.
- Payments: **Dual flow** — online booking via Razorpay gateway + pay-at-venue option.
- Hardened with **rate limiting, input validation, and email notifications via Resend.**
- **Tech:** React, TailwindCSS, React Hook Form, Node.js, Express, MongoDB, Mongoose, Razorpay, Resend, Rate Limiter, JWT

Zerodiet — Online Personal Training Platform - [Live](#)

- Client intake platform for a personal trainer: users sign up via email OTP or Google login, select a plan, and complete a detailed onboarding form (goals, schedule, dietary preferences).
- Trainer/admin panel to manage clients: sending diet/training plans, tracking progress, earnings dashboard.
- **Tech:** React, TailwindCSS, React Hook Form, Redux, Appwrite.

EDUCATION

12th (WBCHSE) • Rampurhat JL Vidyabhaban • 92.2% • 2019

10th (WBBSE) • Kusumba High School • 86.6% • 2017

No formal CS degree — every skill listed above was learned through self-study and applied in real, delivered projects.
